

Hematology Services

RUSH is a leader in the diagnosis and treatment of benign and malignant hematologic disorders. Our hematology experts are available to provide second opinions to help patients obtain an accurate diagnosis and select the best course of treatment.

Our Capabilities

Multidisciplinary Clinics

Patients with leukemia, lymphoma, multiple myeloma, amyloidosis, myelodysplastic syndromes, myeloproliferative neoplasms and aplastic anemia can receive individual care and treatment plans through The Coleman Foundation Comprehensive Clinics.

Center of Excellence for Myelodysplastic Syndromes

RUSH is also recognized as a Center of Excellence by the Myelodysplastic Syndrome (MDS) Foundation for its MDS expertise and research.

Bone Marrow Transplant and Cellular Therapy Program

Our Bone Marrow and Stem Cell Transplant program is accredited by the Foundation for the Accreditation of Cellular Therapy, which recognizes our compliance with quality standards for cell collection, laboratory processing and transplantation. The Bone Marrow Transplant and Cellular Therapy program at RUSH has high survival rates.

Molecular Profiling

Hematology care at RUSH includes molecular profiling to analyze each patient's unique genetic makeup and make decisions that will be most effective for them.

CAR-T Therapy

CAR-T therapy is indicated for certain patients with hematologic malignancies and is available at RUSH. This immunotherapy uses patients' altered T cells to treat the cancer.

Von Willebrand Disease Treatment

At RUSH, we have a dedicated clinic for patients with von Willebrand disease, a genetic bleeding disorder that affects up to one percent of people in the United States.

Conditions We Treat

Malignant Blood Disorders

- Leukemia
- Lymphoma
- Multiple myeloma
- Myelodysplastic syndromes
- Myeloproliferative neoplasms

Benign Blood Disorders

- Clotting and bleeding disorders
